Biology Seminar Series
Spring 2016

Fridays at Noon in Olmsted 266

February 12th, 2016
Effects of the maternal and developmental environments on adult behavior and physiology
Jennifer Grindstaff, Oklahoma State University

February 26th, 2016
Examining plant evolutionary responses to climate change using resurrection genomics
Steven J. Franks, Fordham University

April 8th, 2016
The phosphorylome: characterizing molecular regulators of dopamine signaling in medium spiny neurons
Harrison Brody, Rockefeller University

April 15th, 2016
Kidney disease mutations found in a genomic blind spot
Andrew Kirby, Eisai Research Institute

April 29th, 2016
Do hormonal syndromes underlie behavioral syndromes? Decomposing notoriously variable traits in a wild songbird
Alex Baugh, Swarthmore College
